Index to Volume 57

The Journal of Heredity, 1966

A

A Allele Necessary for Dilute Coat Color in Horses, W. Ralph Singleton and Queta Carter Bond, 75.
Abbott, U. K. and J. A. MacCabe, Ectrodactyly: A New Embryonic Lethal Mutation in the Chicken, 207.
Abraham, Susan and Harold H. Smith, DNA Synthesis in the B Chromosomes of Maize, 78.
Addendum—Chromosome Numbers in the Order Insectivora, D. S. Borgaonkar, 28.
Ahloowalia, B. S., Chromosome Pairing in Aneuploid Perennial Ryegrass, 129.
Arisumi, T. and R. N. Stewart, Genetic and Histogenic Determination of Pink Bract Color in Poinsettia, 217.

Animal Genetics:

Allelic combinations, rapid determination of numbers of possible, 187.
Cats: independent assortment of dominant white and polydactyly, 17; morphological effects of the Manx factor, 100; gene frequencies in the population of New York City, 185.
Cattle: herd of glass-eyed albino Hereford, 179.
Cockroach: genetic variability in the German; genetic data and establishment of tentative linkage groups, 221.
Drosophila melanogaster: X-linked electrophoretic variation in 6-phosphogluconate dehydrogenase, 58; histophenotype of antennaless mutation, 81.
Drosophila pararubida; cytology, 51.
Drosophila pseudoobscura: gene arrangements in the third chromosome, 151.
Fowl: frequency of parthenogenesis in chicken eggs, 23; variegated ovaries in the pheasant, 31; buff and albino Japanese quail—description, inheritance, and fitness traits 119; m cromelia, a lethal mutation in White Pekin ducks, 137; ectrodactyly, a new embryonic lethal mutation in chickens, 207.
Ferret: somatic chromosomes, 110.
Frogs: mid-dorsal stripe in wood, 65; successful tissue transplantation produced by nuclear transfer, 167.
Honey bee: potential for multiplying a clone of sperm by androgenesis, 213.
Horses: *A* allele necessary for dilute coat color, 75.
Mammalian genetics: Jackson Laboratory, a center for, 3.
Mating systems: influence on parent-offspring regression, 124.
Mice: decreased survival of embryos in yellow ($A^{y}a$) female, 14; association of megacolon with two recessive spotting genes, 29; retinal degeneration is rodless retina, 47; inheritance of an erythrocyte and kidney esterase, 197; pugnose linkage, 229.
Mink: erythrocyte antigen mosaicism in domestic, 19.
Muskrat: chromosomes, 104.
Primates: list of chromosome numbers, 60.
Rabbits: hydrocephalus and cleft palate in an inbred colony, 142; spina bifida, 236.
Rats: autosomal polymorphism in a laboratory strain, 231.
Sheep: viable hypotrichosis in Poll Dorset, 87.
Snail: new information on the inheritance of polymorphic characters in *Cepaea hortensis*, 245.

Ash, William J., Micromelia—A Lethal Mutation in White Pekin Ducks, 137.
Association of Megacolon with Two Recessive Spotting Genes in the Mouse, Priscilla W. Lane, 29.
Autosomal Polymorphism in a Laboratory Strain of Rats, Nestor O. Bianchi and Omar Molina, 231.

B

Bartke, Andrzej and George L. Wolff, Decreased Survival of Embryos in Yellow ($A^{y}a$) Female Mice, 14.
Basrur, Parvathi K., Somatic Chromosomes of the Ferret, 110.
Bell, A. E., *et al.*, Influence of Mating Systems on Parent-Offspring Regression, 124.
Bianchi, Nestor O. and Omar Molina, Autosomal Polymorphism in a Laboratory Strain of Rats, 231.
Bond, Queta Carter and W. Ralph Singleton, *A* Allele Necessary for Dilute Coat Color in Horses, 75.

Books Reviewed:

Bell, Eugene (editor), Molecular and Cellular Aspects of Development, 68.
Lerner, I. Michael and H. P. Donald, Modern Development in Animal Breeding, 226.
Reed, Elizabeth W. and Sheldon C. Reed, Mental Retardation: A Family Study, 70.
Sturtevant, A. H., A History of Genetics, 202.
Thompson, James S. and Margaret W. Thompson, Genetics in Medicine, 205.
Vandenberg, Steven G., (editor), Methods and Goals in Human Behavior Genetics, 203.
Whittinghill, Maurice, Human Genetics and its Foundations, 67.

Borgaonkar, D. S., Addendum—Chromosome Numbers in the Order Insectivora, 28.
Briggs, Robert W., Recognition and Classification of Some Genetic Traits in Maize, 35.
Brooker, M. G. and C. H. S. Dolling, Viable Hypotrichosis in Poll Dorset Sheep, 87.
Browder, Leon W., *et al.*, Mid-Dorsal Stripe in the Wood Frog, 65.
Buff and Albino Japanese Quail: Description, Inheritance, and Fitness Traits, K. Sittmann, *et al.*, 119.
Burns, J. A., The Heterochromatin of Two Species of *Nicotiana*, 43.
Bussey Institution: Harvard University Graduate School of Applied Biology, 1908–1936, Karl Sax, 175.
Butler, L., *et al.*, Third List of Known Genes in the Tomato, with Revised Linkage Map and Additional Rules, 189.

C

Chromosome Pairing in Aneuploid Perennial Ryegrass, B. S. Ahloowalia, 129.
Chromosomes of the Muskrat, Wellington Moore, Jr., *et al.*, 104.
Clayberg, C. D., *et al.*, Third List of Known Genes in the Tomato, with Revised Linkage Map and Additional Rules, 189.
Cochran, Donald G. and Mary H. Ross, Genetic Variability in the German Cockroach; I. Additional Genetic Data and the Establishment of Tentative Linkage Groups, 221.
Conference on Leukocyte Chemistry and Morphology Correlated with Chromosome Anomalies, 141.
Cook, L. M. and James Murray, New Information on the Inheritance of Polymorphic Characters in *Cepaea hortensis*, 245.
Cox, D. F., The Future of Animal Breeding (Rev.), 226.
Crary, Dorcas D., *et al.*, Spina Bifida in the Rabbit, 236.

O–P

Olsen, M. W., Frequency of Parthenogenesis in Chicken Eggs, 23.
Pairing Between *Triticum aestivum* and *Haynaldia villosa* Chromosomes, Gerald Halloran, 233.

Plant Genetics:

Allelic combinations, rapid determination of numbers of possible, 187.
Barley: induced twinning, 227.
Cacao: hybridization with *Theobroma grandiflora*, 134.
Cotton: effect of cytoplasm on expression of the gene for external ovules in *Gossypium arboreum*, 72; embryological study of female sterility, 247.
Dioscorea: sex ratio and sex determination, 95.
Maize: recognition and classification of some genetic traits, 35; DNA synthesis in the B chromosomes, 78; gene dosage effects at the *ae* locus on amylose content of endosperm, 90; dosage effects of the knotted gene on growth and development, 91; inverted ear mutant, 211; fatty acid composition of oil of parental inbreds and reciprocal crosses, 243.
Nicotiana: heterochromatin of two species, 43; effect of monosomy on variegation in hybrids between two species, 126.
Onion: improved method of producing hybrid seed, 55; heritability and genetic correlation of some bulb traits, 105.
Pea: neoplastic pod, 83.
Poinsettia: genetic and histogenic determination of pink bract color, 217.
Polyploids: tissue culture as a potential tool in obtaining, 115.
Ryegrass: chromosome pairing in aneuploid perennial, 129.
Spinach: synthesis of heteromorphic sex chromosomes, 182.
Tomatos: third list of known genes, with revised linkage map and additional rules, 189.
Wheat: linkage between genes for reaction to powdery mildew and for length of vernalization requirement, 201; pairing between *Triticum aestivum* and *Haynaldia villosa* chromosomes, 233.
